## **Cost Down Packaging Opportunitites**

# *Global Automotive Solutions*

At the forefront of cost efficient reusable packaging design for the automotive industry, LINPAC Allibert delivers innovative solutions to integrate both your domestic and international supply chain needs.

Committed to environmental responsibility, our goal is to conserve natural resources, reduce energy consumption and minimise emissions. We have the capability to address the special circumstances of each commercial customer and tailor a versatile solution to maximise both your recycling and cost requirements.

Your local team has a wealth of automotive logistics experience and currently provide technical, financial and project management support of launch program packaging to international Automotive OEMs, Tier Suppliers and logistics companies alike. Choose LINPAC Allibert for all your packaging needs, including material handling, intelligent packaging, asset management and custom design.

While you network with industry professionals debating current automotive issues, we would be delighted to welcome you onto our stand to discuss your individual packaging requirements.

Kind regards,

Piotr Wisniewski  
General Sales Manager Central & Eastern Europe  
LINPAC Allibert

# Global Automotive Solutions

## Cost Down Packaging Opportunities

### The Company

With multiple manufacturing and support facilities around the world LINPAC Allibert is the largest global **supplier of reusable packaging solutions** to the automotive industry. You can rely on an organisation designed to efficiently **integrate** with both **domestic and International supply chain** needs as your operations cross borders. Automotive OEM's, Tier Suppliers and Logistics companies world-wide choose LINPAC Allibert for Global solutions including material handling, intelligent packaging, asset management, custom design and support.

Bespoke Supply In-Line Sequencing (SILS) system.

Folding Large Container with internal fabric dunnage.

### GAS Team

The Global Automotive Solutions (GAS) Team was established to coordinate the European sourcing of RTP and assist our customers to implement the **cost down** benefits of their International supply chain. GAS personnel have a wealth of automotive logistics experience and provide technical, financial and project management support of **launch programme packaging** from design to delivery.

### Recycling

Committed to environmental responsibility our goal is to **conserve natural resources, reduce energy consumption and minimise emissions**.

We have the capability to address the special circumstances of each commercial customer with the flexibility to collect containers from global locations and manage the recycling process.

### Repair & Maintenance

LINPAC Allibert offers a comprehensive Repair & Maintenance service which can be tailored to a company's specific requirements. We have a dedicated R & M business unit which will organise maintenance and repairs at a LINPAC Allibert repair centre nearest to the customer.
